

Spring Release Latch Series 701

Combining a hinge and a latch in a standard piece of hardware.

The Spring Release Hinge has either a pair of spring-loaded handles or a single handle, which pulls toward the center to release the body or door from the keeper. An alternate style relies on an engagement hole or slot in the adjoining surface. Installation is simple and inexpensive using screws, rivets or by welding.

All styles are manufactured to close tolerances. End play and side play are held to a minimum, insuring a precision fit and smooth operation.

BODY

	Standard	Special
L Length	1.75	-
W Width	1.00	-
DASH #	-1	-7

PIN

	Standard	Special
P Pin Diameter	.250	.281
T Metal Thickness	.050	.062
